# The Objectives

The event focused both to academia and to industry and submitted papers will be peer reviewed before publication in *IOP Conference Series Materials Sciences and Engineering*, which is refereed by SCOPUS and many others. The international conference **ic-cmtp3** provides a platform among leading international scientists, researchers, engineers, students and PhD students for discussing recent achievements in research and development of material structures and properties of competitive materials like nanomaterials, ceramics, glasses, films and coatings, metals, alloys, biomaterials, composites, hetero-modulus and hybrid-materials, ... etc.

Among the major fields of interest are materials with extreme physical, chemical, thermal, mechanical properties and dynamic strengths; including their crystalline and nano-structures, phase-transformations as well as methods of their technological processes, tests and measurements.

Promote new methods and results of scientific researches and multidisciplinary applications of material science and technological problems encountered in sectors like ceramics, glasses, metal alloys, thin films, aerospace, automotive and marine industry, electronics, energy, security, safety and construction materials, chemistry, medicine, cosmetics, biosciences, environmental sciences are of particular interests.
